

Notes

- Lasting around 50 minutes in total;
- Quantities for '20' items;
- If the activity can be adapted to fit different themes, this is a bonus!

**1.  
Two  
coloured  
paracord  
bracelet**

Should look like this:

Step 1

Step 2

Per Student:

2 colours of  
paracord,  
scissors,  
lighter,  
ruler

**CRAFT METHOD:**

It is easy to learn and fast to make.

**Step 1.** Take a piece of paracord fold it in half and try it around your wrist. If it fits, add about 3 inch and tie off at the end.

E.g. An 8" wrist requires 16" paracord + 3" for knot = 19"

Step 3.

Step 4.

**Step 2.** Measure how much of the bracelet you want of the paracord to cover – for every inch, you will need a foot of paracord.

E.g An 8” wrist – leave 1” either side for loop and finishing off to knot – therefore, 6” – so 6ft of paracord

**Step 3.** Once you have chosen your two colours, cut the length of paracord needed - half from one colour and half from other colour e.g. 6” total length to 3” one colour, and 3” in other colour. Then stick together by melting the ends with the lighter; this makes it easier to weave.

**Step 4.** The next 4 pictures show you how to do the weave. This weave is called the cobra weave and is really easy. After you do this weave, do it again **on the other side.**

Step 5.

**Step 5.** Keep weaving to the end. The ends can be cut off if you have left over paracord. Melt the edges into the bracelet for a neat finish.
